NOTE: The regular price for a whole-school-site-licence is \$100 per year (less for small schools)

THE SPELLING CENTRE

The first 200 words

Early Primary & Remedial Spelling Software

The Spelling Centre - The First 200 Words comes highly recommended by Special Education, Reading Recovery and THRASS teachers, Speech Pathologists, and Learning Consultants across Australia.

Our software is educationally sound. Words are taught in meaningful context, but are also broken into their phoneme-grapheme 'chunks' and "sounded out". Learners are never exposed to incorrect word images anywhere in our program.

Students using *The Spelling Centre* require little or no supervision. They learn at their own pace, and upon completing a 15 minute spelling lesson, students are rewarded with a short arcade game (such as "Frog Splat!"). Students' results are tracked, and our "Smart List" feature can allocate new words for each lesson automatically.

Teachers have the option to set their own word lists and can print progress reports. Our extensive PDF Manual includes 80+ printable spelling activity pages (BLMs).

Please take this opportunity to trial our software in your school.

You can also play a demo version on our website at: www.spellingcentre.com
